

I am currently a last year student in Computer Engineering at the University of Technology of Belfort-Montbéliard ( [www.utbm.fr](http://www.utbm.fr)) and I am looking for a placement; in AI or/and imagery ; to complete my engineering education.

This placement should last 24 weeks from the 7<sup>th</sup> February 2011. Furthermore the subject proposed must be approved by my university.

It will be for me a great occasion to put into practice the skills acquired during my studies.

As you can see from my curriculum vitae, I have been given a grounding in many aspects of computer sciences.

In addition, during my studies, I have handled many projects in computer programming. These projects were an occasion to work in a team of either three or four people and were always successful.

Furthermore my rigor, my motivation to learn from a new working environment and my capacity to adapt are the reasons why I feel I will be quickly useful to your company.

If you need any further information please contact me.

I hope you will consider my request favorably, and I look forward to hearing from you.

Yours faithfully,
