

Dear Madam or Sir,

I am currently a last year student in Computer Engineering at the University of Technology of Belfort-Montbéliard (www.utbm.fr) and I am looking for a placement; in AI or/and imagery ; to complete my engineering education.

This placement should last 24 weeks from the 7th February 2011. Furthermore the subject proposed must be approved by my university.

It will be for me a great occasion to put into practice the skills acquired during my studies.

In addition, during my studies, I have handled many projects in computer programming. These projects were an occasion to work in a team of either three or four people and were always successful.

As you can see from my curriculum vitae, I have been given a grounding in many aspects of computer sciences and I am more interesting about Imagery and AI for games. It is why ; knowing your importance on this area ; I would love to work in your company.

Furthermore my rigor, my motivation and my capacity to adapt in addition of my actual knowledge of your company (through your video games) are the reasons why I feel I will be quickly useful to your company.

If you need any further information please contact me.

I hope you will consider my request favorably, and I look forward to hearing from you.

Yours faithfully,
